GrowSaver™
BY SANUVOX

CHEMICAL FREE POWDERY MILDEW PREVENTION SYSTEM

GC BIOWALL MAX

The power of the sun inside your HVAC system

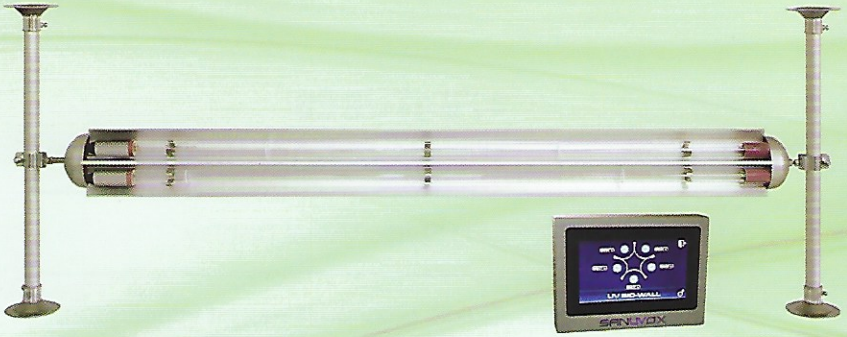
The Sanuvox Green Clean Biowall Max system uses the power of the sun's UV rays to disinfect the indoor air and prevent powdery mildew contamination. A patented, high-intensity UVC chamber is directly integrated with the cultivation facilities HVAC system and will continually kill up to 99.9% of airborne fungus, mold, and bacteria every hour.

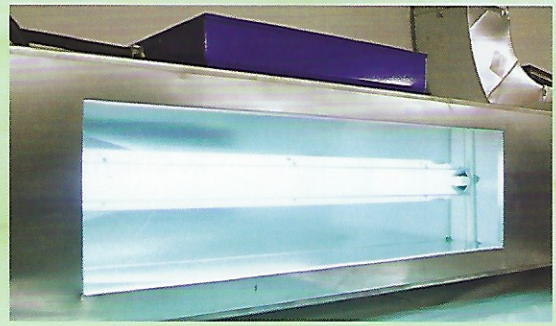
The best technology on the market

Only Sanuvox uses high-intensity T6 germicidal UVC lamps mounted parallel to airflow on anodized aluminum parabolic reflectors for a full 360-degree disinfection of passing airborne contaminants.

Proven effectiveness

Tested by the U.S. EPA and Homeland Security for Biological Inactivation Efficiency by HVAC In-Duct Ultraviolet Light Air Cleaners to achieve up to 99.9% disinfection on one pass inactivation.





BENEFITS

A chemical-free solution

- Virtually eliminates the need for fungicides
- Non-invasive, non-toxic, completely green solution that leaves zero residue and no environmental footprint
- Reduces labor costs associated with using manual cleaning systems

FEATURES

Available in 30", 40", 50" and 60" lamp lengths

Simulated Real-time kill rates
and personalized sizing calculations available

BMS Dry Contacts
and remote monitoring screen available

Longest lamp life in the industry

Designed for Air Handlers of up to 100 tons

Maintenance free solution

WARRANTY 15 YEARS ON BALLASTS

WARRANTY 2 YEARS ON LAMPS

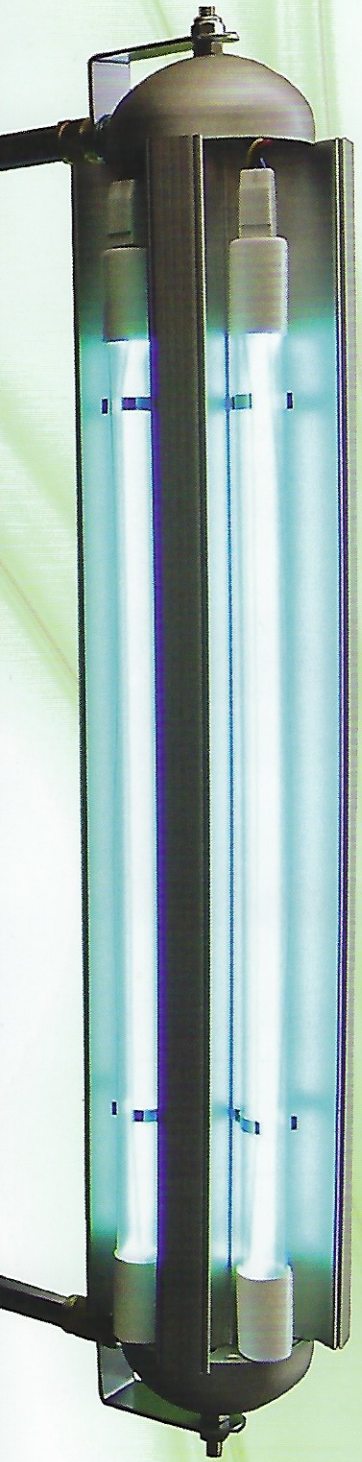
CHEMICAL FREE POWDERY MILDEW PREVENTION SYSTEM



GC QUATTRO-G

The power of the sun inside your HVAC system

The Sanuvox Green Clean Quattro-G system uses the power of the sun's UV rays to disinfect the indoor air and prevent powdery mildew contamination. A patented, high-intensity UVC chamber is directly integrated with the cultivation facilities HVAC system and will continually kill up to 99.9% of airborne fungus, mold, and bacteria every hour.

The best technology on the market

Only Sanuvox uses high-intensity T6 germicidal UVC lamps mounted parallel to airflow on anodized aluminum parabolic reflectors for a full 360-degree disinfection of passing airborne contaminants.

BENEFITS

A chemical-free solution

- Virtually eliminates the need for fungicides
- Non-invasive, non-toxic, completely green solution that leaves zero residue and no environmental footprint
- Reduces labor costs associated with using manual cleaning systems

FEATURES

Utilized for 5-ton Air Handler Systems

LED Status Visual Display

Quick, easy duct mount installation

WARRANTY 3 YEARS ON BALLASTS

WARRANTY 2 YEARS ON LAMPS

GrowSaver™
BY SANUVOX

CANNABIS ODOR MITIGATION SYSTEM

Sanuvox Green Clean line can be equipped with Cannabis Odor Mitigating Lamps

Sanuvox utilizes a shorter frequency of UV light called Vacuum UV or UVV to destroy odors by photolysis. This frequency of light produces oxidizers that actively eliminate cannabis odors within a duct system.

Utilizing a fan and 20 feet of ducting, the Sanuvox system can eliminate exhausted Cannabis odors. Maintenance required is routine annual lamp replacement, thus no more costly and urgent carbon filter change outs.

BENEFITS

- Destroys up to 99% of Cannabis odors being exhausted
- Less maintenance and energy draw than Carbon filters
- Removes odors from common spaces such as hallways and offices

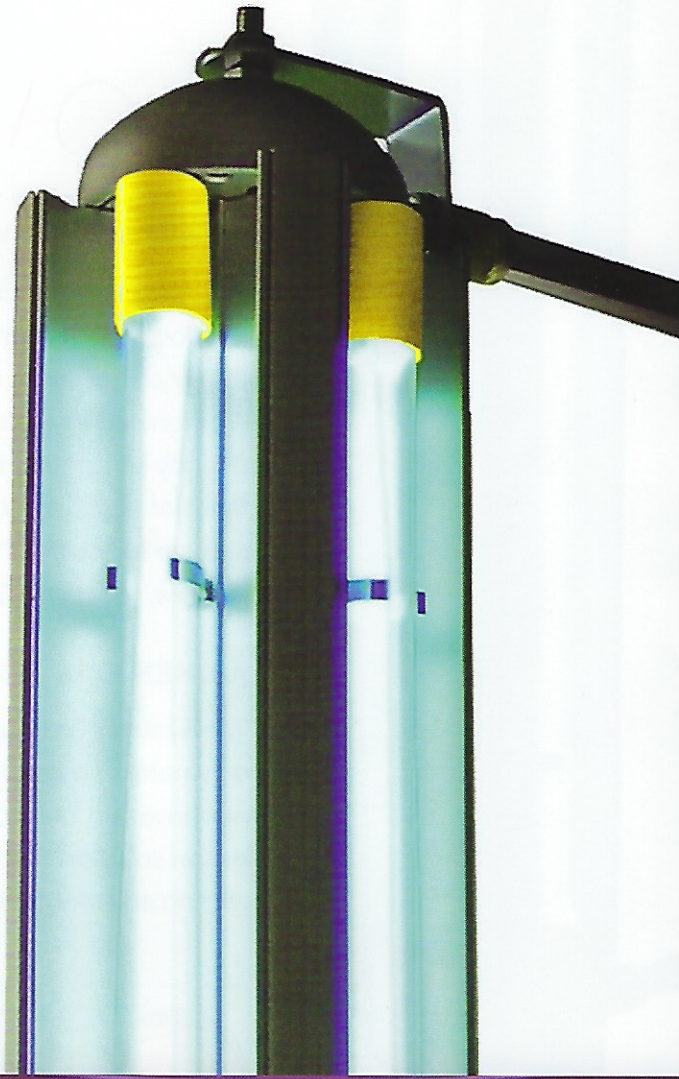
FEATURES

Exhaust Duct mounted or stand alone units available.

Plug and play options

Sized specifically for your odor problem

No maintenance for one year



WARRANTY 1 YEAR ON ODOR MITIGATION LAMPS

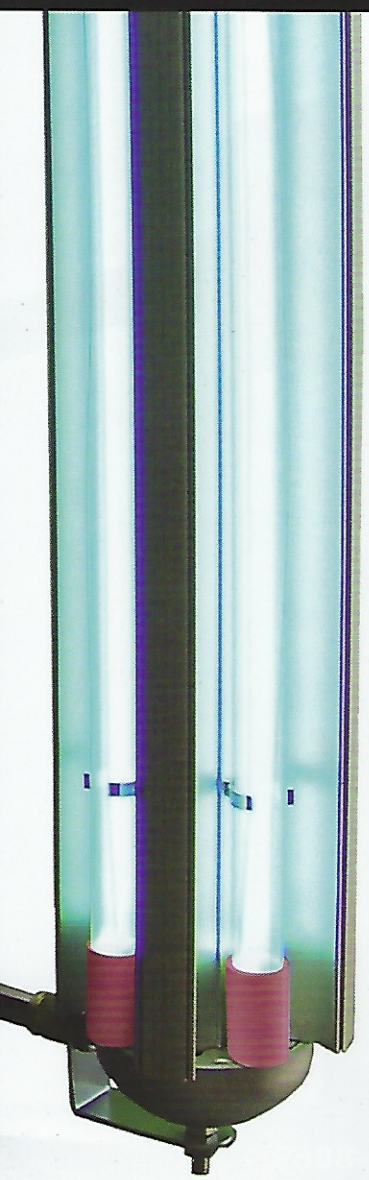
GrowSaver™
BY SANUVOX

PREVENT POWDERY MILDEW

- Eliminates up to 99.9% of airborne powdery mildew every hour
- Reduces fungicide use by up to 90%
- Reduces labor costs related to the use of fungicides
- Helps enrich terpenes
- Provides an environment for harvest consistency
- Improves microbiological state testing compliance



HOW IT WORKS

THE POWER OF THE SUN INSIDE YOUR HVAC SYSTEM

The Sanuvox GrowSaver™ system uses the power of the sun's UV rays to disinfect the air and **prevent crop contamination**. A patented high-intensity UVC chamber, directly integrated with the cultivation facilities HVAC system, continuously **kills up to 99.9% of airborne Powdery Mildew, Mold and Bacteria every hour**.

A CHEMICAL-FREE SOLUTION

The Sanuvox GrowSaver™ system virtually eliminates the need for fungicides. It is a non-invasive, non-toxic, completely **green solution** that leaves **zero residue** and no environmental footprint.

THE BEST TECHNOLOGY ON THE MARKET

Only Sanuvox uses **high-intensity T6 germicidal UVC lamps** mounted parallel to airflow on anodized **aluminum parabolic reflectors** for a full 360-degree disinfection of passing airborne contaminants.

PROVEN EFFECTIVENESS

Tested by the U.S. EPA and Homeland Security for Biological Inactivation Efficiency by HVAC In-Duct Ultraviolet Light Air Cleaners to achieve **up to 99.9% disinfection** on one pass inactivation.
